Help improve diagnosis for cancer patients, help make a
difference.**

Seeking part-time Life Sciences Postdoc

Help a new not-for-profit organisation focussed on quality of diagnostic testing in pathology get off to flying start! We care about improving diagnostic testing for patients by ensuring test quality through quality assessment. We have several new projects and need extra help.

We need a person who is prepared to learn lots of new things!

Fluent English required. Should have a PhD/in training in following areas (or similar): Biochemistry, Pharmacology, Molecular Biology, Pathology or Medicine.

Who we are

An international association with worldwide membership of academic organisations and major Pharmaceutical companies see: www.iqnpath.org.

What we do

We work with external quality assessment providers, companies, EU bodies and standards/regulatory agencies to improve diagnostic testing in clinics such as hospitals and private clinics. Our main focus is cancer diagnostics.

What we are offering

Flexible working hours: 1-2 days a week to work with the Executive Director in Glasgow. Working from home with regular face to face meetings – also with members of the network. This is paid position.

What you will learn

Discover the world of laboratory diagnostic testing and the practicalities of clinical implementation of precision medicine/companion diagnostics.

Participate in teleconferences with world-leading experts, companies, learn about grant writing, be involved in publications, managing international projects and how diagnostic testing works in the clinic.

This could open your eyes to a completely new future career.
